SKILLS

Technical Skills: Responsive Web Design, HTML5, CSS3, RESTful APIs, MongoDB, Express.js, Git, Node.js, Redux, React, JavaScript

Soft Skills: Adaptability, Teamwork, Problem Solving

EXPERIENCE

Venture Consultancy Pvt. Ltd. | *Java Developer*

Jun 2024 - Jan 2025

- Designed and implemented RESTful APIs using Spring Boot and PostgreSQL for core hospital operations with full CRUD support
- Achieved 90%+ test coverage with JUnit and Mockito while optimizing codebase with Java 8+ features, modular design, and reusable service layers

PROJECTS

Online Voting System | *Node.js, Express.js, MongoDB, React.js, Tailwind.css, GIT, Render*

-  Deployed Link : <https://votting-system.netlify.app/>
-  Github Repo : <https://github.com/pk65arya/Online-Voting-App>
- Assisted in developing an online voting platform enabling user registration, secure login, and voting functionality using React.js and Tailwind CSS.
- Supported backend implementation with Node.js, Express.js, and MongoDB to manage elections, candidate setup, and user data verification.
- Contributed to vote consolidation, real-time results display, and deployed the application using Git and Render.

Personal Finance Management | *Javascript, Firebase, Html, CSS*

-  Deployed Link : <https://personalfinancemanagement.netlify.app>
-  Github Repo : <https://github.com/pk65arya/personalFinanceManagement>
- Developed a smart budgeting dashboard with real-time tracking of income, expenses, and savings using JavaScript and Firebase.
- Enhanced UI accessibility and mobile usability by designing a responsive layout with HTML and CSS, resulting in a 30% improvement in usability scores.
- Integrated user feedback to refine UX flows, reducing task completion time by 20% and automating budget monitoring to minimize manual effort.

Payout Automation System | *Java , Spring Boot, React.js, PostgreSQL*

-  Deployed Link : <https://payoutautomationsystem.onrender.com/>
-  Github Repo : <https://github.com/pk65arya/PayoutAutomationSystem>
- Developed backend logic for an EdTech automation tool using Java, Spring Boot, and PostgreSQL, automating mentor session tracking and payment processes.

- Designed and deployed RESTful APIs and role-based dashboards, reducing admin time by 70% and improving session data handling speed by 25%.
- Implemented a secure chat feature for dispute resolution and optimized SQL queries to enhance backend performance and API response times.
